**Collecting the Data: Templates and Resources for the School Library Media Specialist**

Home Reading Collaboration Collection Development Program Perception Other Online & Print Resources

The mission of the data project is to provide School Library Media Specialists with strategies and tools to evaluate and to promote the School Library Media Program.

Monitoring Our Mission

Using Information Power 2 as a guiding document, this website is divided into four main areas: reading, collaboration, collection development, and program perception.

Although this website is divided, the four concepts are intertwined and related to each other as demonstrated in the graphic below. Many of the resources found in this site can be used with more than just one area of our focus.

Collaboration Program Perception
